STG INDUSTRIAL · DESIGN HANDOFF

Company Profile Design Brief & Content Pack

Everything finalised to date for the STG Industrial company profile brochure — brand direction, approved page-by-page content, layout specification, and reference assets — prepared for the appointed designer.

PREPARED FOR	CLIENT	DATE
Appointed Brochure Designer	**STG Industrial W.L.L · Doha**	**19 October 2026**

01 Company & Brand Snapshot

LEGAL NAME	**STG Industrial Services & Trading W.L.L**
LOCATION	**Birkat Al Awamer, Doha, State of Qatar**
SECTOR	**Engineering services & industrial supply — process industries**
KEY PARTNERSHIP	**Authorized partner of HERMETIC-Pumpen GmbH, Germany**
DELIVERABLE	**9-page A4 company profile brochure (print + digital PDF)**
LANGUAGE	**English primary, with Arabic accents (bilingual GCC style)**

Brand concept (the line that drives everything)

> **"From the moment oil is pumped from the ground until it reaches its destination — STG provides everything."**
> The brochure should feel like it belongs to a serious Gulf oil-&-gas / process-industry company, not a European design studio. Think QatarEnergy / Aramco / ADNOC register: institutional, confident, premium.

Approved design direction

A **GCC oil-&-gas aesthetic** was reviewed and approved over four alternative directions (datasheet, sectional, bold-monolith, editorial). The chosen style uses:

- **Deep petroleum green + gold** as the lead pairing — the classic Gulf premium combination.
- **Mashrabiya / Islamic geometric pattern** as a subtle background texture (gold, low opacity).
- **Oil & gas plant imagery** — refinery / distillation columns / spherical (Horton) tanks / pipe racks, ideally real photography with a green-gold treatment.
- **Bilingual English + Arabic** — Arabic set alongside English headings and key lines.
- **Institutional, symmetric, gold-framed** layout — heavier and more formal than an airy editorial look.

> **Colour rule (from the logo brief):** green stays the lead colour but in a deeper, more industrial shade; charcoal / steel grey as support; gold as a **small accent only**; no other colours.

02 Visual Specification

Colour palette

Petroleum Green	Deep Green	Gold Accent	Steel Grey	Sand / Paper
#0C3A2C · lead	#06251C	#C4A24C	#4A5159 · support	#F3EDE0

Hex values are the working reference used in the approved concept; the designer may fine-tune within this family. Gold strictly an accent.

Typography (suggested)

DISPLAY / HEADINGS	**Clean geometric sans in caps (e.g. Space Grotesk, or a strong grotesque)**
BODY	**Inter / Helvetica Neue — neutral, legible**
LABELS / DATA	**Monospace accents for eyebrows & captions (optional)**
ARABIC	**Noto Kufi Arabic (geometric, architectural — matches the pattern motif)**

Recurring design elements

- Gold inner **frame with corner brackets** on cover & back cover (institutional feel).
- Green **section header band** with a large gold section numeral + English title + Arabic sub-title.
- Green **feature panels** with a gold top/left border for quotes, "Did You Know", and callouts.
- A faint **plant-skyline strip** and the geometric pattern as repeating atmosphere.

Format

SIZE	**A4 portrait (210 × 297 mm), 9 pages**
BLEED	**Add 3 mm bleed + crop marks for print**
OUTPUT	**Print-ready PDF/X + a web-optimised PDF; keep editable source (AI/INDD)**

03 Reference Assets

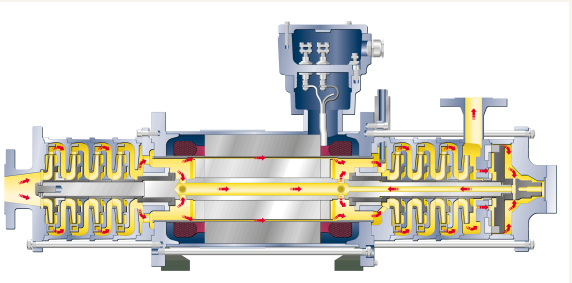

The following are provided as reference for building the brochure. Use the final logo master files supplied separately for all placements.

STG INDUSTRIAL
SERVICES AND TRADING W.L.L
Innovation Engineered Just for You

Logo — supplied separately as master files (full-colour, horizontal & stacked lockups). The mark shown here is for placement reference only.

Approved theme reference — the green / industrial-photo direction the client liked (tagline: "Empowering Progress Through Engineering Brilliance").

Hero technical image — multi-stage canned motor pump, sectional cutaway. Usable as the recurring "rotating equipment" visual.

STG INDUSTRIAL
SERVICES AND TRADING W.L.L

STG INDUSTRIAL
SERVICES AND TRADING W.L.L

Logo lockups — horizontal and stacked versions with the "Services and Trading W.L.L" bar.

04 Page-by-Page Content (1 of 4)

All copy below is final and approved. Headings carry an Arabic sub-title (shown in the brackets). Set English as primary.

02 Who We Are — من نحن

INTRO

STG Industrial Services & Trading W.L.L is a Qatar-registered engineering and industrial supply company, built to serve the State of Qatar's process industries with technical capability and reliable execution.

Our founding team brings proven experience from the **KSA process industries market** — a region that sets some of the most demanding standards in pump repair, mechanical seals and industrial supply. We bring that same discipline to Doha.

We specialise in the repair and overhaul of **pumps, motors and mechanical seals** — alongside single-source supply of steel, fittings, flanges, valves, gaskets and safety equipment.

COMMITMENT QUOTE (PANEL)

“To earn long-term trust — one well-executed project at a time.” · أن نكسب الثقة على المدى ~~الطويل~~ — ~~مشروعاً~~ واحداً متقناً في كل مرة.

THREE SERVICE PILLARS

- **Repair & Overhaul** — pumps, motors & mechanical seals restored to OEM-grade performance.
- **Sealless Expertise** — canned motor & magnetic-drive pumps, as authorized HERMETIC partner.
- **Single-Source Supply** — steel, fittings, flanges, valves, gaskets & safety equipment from one accountable vendor.

04 Page-by-Page Content (2 of 4)

03 Why STG — لماذا إس تي جي

THREE REASONS

- **I — Authorized Expertise.** Exclusive authorized service partner of HERMETIC-Pumpen GmbH, Germany, for canned motor pump repair in Qatar.
- **II — Founders' Track Record.** Our team has delivered similar repair and supply work to major process-industry leaders across the region.
- **III — Single Source.** Repair services and industrial supply under one accountable vendor — simplifying procurement for operations, shutdowns and turnarounds.

CLIENT ROSTER BAND

Saudi Aramco · SABIC · SADARA · Ma'aden · Petrokemya · Petro Rabigh · Air Products & affiliates

PROMISE (PANEL)

“To earn long-term trust — one well-executed project at a time.”

04 Pumps — المضخات

LEAD

Pumps move the world's industries — we keep them running, across the full range of technologies used in refining, petrochemicals, power and water. STG restores them to OEM-grade performance after years of demanding service.

PUMP TYPES (8)

- **Centrifugal** — impeller converts rotation into flow
- **Magnetic Drive** — sealless torque via magnetic coupling
- **Reciprocating** — piston & plunger positive displacement
- **AODD** — air-operated double diaphragm
- **Vane** — sliding vanes for low-viscosity duty
- **Submersible** — sealed for full submersion
- **Peristaltic** — hose occlusion, isolated product
- **Screw** — intermeshing screws for viscous flow

DID YOU KNOW (PANEL)

A canned motor pump can run for years without a single drop of leakage — there is no mechanical seal to fail.

VISUAL

Use the canned motor pump cutaway (reference p.4) in a gold frame.

05 Canned Motor & Motor Repair — المحركات المعلبة وإصلاح المحركات

HERMETIC BANNER

EXCLUSIVE AUTHORIZED PARTNER — HERMETIC-Pumpen GmbH · Germany. For the repair and overhaul of canned motor pumps in the State of Qatar.

OUR SEALLESS PUMP EXPERTISE

- **Containment shell** inspection & replacement
- **Magnet assembly** repair (inner & outer)
- **Bearings & shaft** alignment & refurbishment
- **Hydraulic & torque** testing to specification

MOTOR REPAIR & REWINDING

- Inspection, diagnosis & condition reporting of **LV motors**
- Complete stator rewinding & rotor balancing
- Bearing replacement & shaft refurbishment
- Insulation, surge & no-load testing

WORKSHOP CAPABILITY (PANEL)

Precision machining, dynamic balancing and dedicated bays for canned motor & centrifugal pumps — every repair documented with a full service report. (Note: ATEX certification in progress.)

Content correction applied: motor rewinding capability is **LV (low-voltage) only** at present — **MV has been removed** everywhere it previously appeared. Do not reinstate MV.

06 Mechanical Seals — الأختام الميكانيكية

LEAD

The mechanical seal is where reliability is won — or lost. A failed seal can shut a process line and halt a plant within minutes. STG offers a complete mechanical seal capability — repair, refurbishment, re-engineering and supply of new seals.

SEAL TYPES (6)

- **Cartridge Seals** — pre-assembled, factory-set units
- **Component Seals** — rubber bellows, pusher & metallic bellows
- **Dual Seals** — back-to-back, face-to-face & tandem
- **Dry Gas Seals** — non-contacting, for compressors
- **Split Seals** — installed without dismantling equipment
- **Agitator & Mixer Seals** — heavy-duty, side loads & runout

07 Seal Expertise (End-to-End) خدمات الأختام المتكاملة

FOUR-SERVICE SET

- **Repair** — worn seals restored to original performance
- **Refurbishment** — faces, springs, secondary seals & metal components
- **Re-engineering** — designs improved for life & reliability in difficult service
- **Supply** — new seals across all major OEM brands & designs

WORKSHOP & TESTING

- Precision machining of seal faces & metallic components
- Lapping & polishing for seal-face flatness
- Pressure & leak testing of repaired / new assemblies
- Dimensional inspection, material verification & failure analysis

MULTI-BRAND QUOTE (PANEL)

"We are not tied to a single seal brand — we repair what you have, source what you need, and recommend what works best."

08 Industrial Supplies التوريدات الصناعية

EIGHT CATEGORIES

- **Steel Products** — carbon, stainless, alloy & duplex
- **Pipe Fittings** — butt-weld & socket-weld, all schedules
- **Flanges** — 150# to 2500#, ASME B16.5 & B16.47
- **Valves** — gate, globe, check, ball, butterfly; manual & actuated
- **Gaskets** — spiral wound, kammprofile, RTJ, camprofile & sheet
- **Fasteners** — ASTM A193 / A194 / A320
- **Industrial Hoses** — hydraulic, chemical, food-grade & steam
- **Expansion Bellows** — rubber, metallic & non-metallic

PPE — NOW A SINGLE LINE

Safety & PPE: a complete range supplied direct from manufacturer — head, eye & face, hearing, respiratory, body, hand, foot and fall protection.

Structure change applied: PPE no longer has its own page — it is folded into Industrial Supplies as a single closing line. (PPE is a trading line, kept to preserve the single-source story, but demoted so engineering stays dominant.)

05 Back Cover & Contact

Page 09 (back cover): mirror the cover — green, gold frame, mashrabiya texture, plant skyline. Centre the contact block below.

ADDRESS

Building No. 56, Street No. 3118, Zone No. 91, Birkat Al Awamer, P.O. Box 23905, Doha, Qatar

info@stg-qatar.com

WEB

www.stg-qatar.com

Address & contacts are the official format from the approved stationery. Arabic address line: دولة قطر — الدوحة — بركة العوامر. Include the website QR code (as used on stationery) if desired.

Also on the back cover

- Authorized partner line — HERMETIC-Pumpen GmbH, Germany
- Full legal name — STG Industrial Services & Trading W.L.L
- © 2026 copyright line, all rights reserved

Assets being supplied

- Logo master files (stationery pack)
- Pump cutaway + workshop photos
- Theme reference image
- This content pack (editable text on request)

Final checklist before print

- **Arabic proofread** by a native speaker — all Arabic lines must be verified before going to print.
- **Logo:** use the supplied final master files for all placements.
- **Photography:** prefer licensed real refinery / plant imagery over illustration for the oil-&-gas feel.
- **MV removed / PPE folded** — confirm both corrections are reflected.
- 3 mm bleed + crop marks; supply print-ready PDF/X and a compressed web PDF.

One-line summary for the designer: A 9-page A4 company profile in a GCC oil-&-gas register — deep petroleum green + gold, mashrabiya texture, plant imagery, bilingual EN/AR — using the finalised copy in this pack, with PPE folded into supplies and motor rewinding shown as LV-only.
